NEOCASTER PL-5
OIL BASED NON-GRAPHITE PLUNGER LUBRICANT

PRODUCT DESCRIPTION:

NEOCASTER PL-5 is an oil based non-graphite type plunger lubricant with low viscosity developed to improve working environment and machine maintainability. NEOCASTER PL-5 is composed of carefully selected lubricants and additives and is excellent for lubrication in a high temperature environment.

BENEFITS:

- Excellent lubricity and tip wetting properties. Strong oil film prevents friction and wear in the tip and sleeve.
- Non-graphite type lubricant promotes a cleaner and safer working environment, contributing to reduced maintenance frequency.
- Does not contain any toxic substances.

PHYSICAL PROPERTIES:

APPLICATION:

Use fluid directly without dilution and adjust it to the production demands.

HANDLING & STORAGE:

Keep in a cool place and avoid direct sunlight. Prevent the product from freezing in the winter. Please refer to the Safety Data Sheet (SDS) for any additional information.

PACKAGING:

NEOCASTER PL-5 is available in 18L pails or 200L drums.
